## Residential Vent & Chimney

### Vent:

Standard efficiency b-vent, high efficiency polypropylene, special gas vent for condensing, near-condensing, and non-condensing vent systems. Stock residential diameters and system components available in 3" – 14". Additional sizes available up to 30". Direct vent systems also available. Premium quality materials and designs backed by UL standards.

### Chimney:

All fuel chimney systems for venting wood, coal, oil, or gas. Available in residential diameters 4" – 8". Additional sizes available up to 24". Pellet venting systems for gas, wood pellet, and bio-fuels. Stainless steel inner and outer materials. Variety of installer friendly components backed by UL standards.

### Chimney Liner:

Aluminum and stainless steel. Lengths available up to 50'. Standard diameters available up to 8". Variety of installer friendly components backed by UL standards.

## Grilles, Registers, & Diffusers

A full line for residential and commercial applications. Offered in steel, aluminum and plastic. Many sizes in stock for quick shipment.

## Flexible Air Duct

Flexible air duct systems UL Greenguard Gold certified for residential and commercial applications. Complete line of R-4.2, R-6.0, and R-8.0 available in many outer jacket and core combinations from 3" - 24" diameters and 25' - 50' lengths. Flexible aluminum, duct, duct sleeves and uninsulated flex duct also available.

**MILCOR.**

## Interior Access Doors

Access Doors – High quality and affordable interior access doors for all types of requirements. In stock or custom.

## Roof Top Products

New construction and retrofit drain systems, flashings, expansion joint covers, equipment rails and curbs, duct supports and pipe mounting pedestals. In stock, or made to order.

**WARD<sup>®</sup>**

## Duct Components

Components and accessories for the residential and commercial HVAC and sheet metal industries including flange, rail, corners, hangers & strapping, and duct access doors.

## Filters

A complete line of Multi-Pleat or Commercial & Industrial Disposable panel filters, available in fiberglass and polyester.

# Introduction

## MODEL TLC ALL-FUEL CHIMNEY

Model TLC All-Fuel Chimney offers current technology in factory-built chimney design by providing superior performance, durability and safety.

### Certification & Applications

Model TLC is safety-tested and listed to applicable UL safety standards for chimneys serving solid-fuel and liquid-fuel appliances. This includes UL 103.

This chimney system is designed for use on appliances that use solid, liquid or gas fuels under natural draft conditions.

Allowable flue gas temperatures are:

	Type HT 5" to 8"	Non-HT 10" to 14"
Maximum Continuous	1000°F	1000°F
Brief Forced Firing (1 hr.)	1400°F	1400°F
Creosote Burn-Out (10 min.)	2100°F	1700°F

### Lifetime Warranty

See the written lifetime warranty for all chimney components on page 20.

### Enhanced Features

Model TLC is extremely corrosion-resistant. Both the inner liner and outer casings are constructed of 304 stainless steel. Embossed couplers do not allow moisture to penetrate the chimney's outer wall. Sections simply twist-lock together and are secured with Locking Bands. The Model TLC product line features deluxe chimney support components that will enhance any installation. Black trims are used to embellish the chimney support component parts that may be installed inside the home.

### Supports

All Model TLC supports are designed to carry four times the UL-listed weight of the listed height.

### Construction

Sizes: 5" to 14"

Inner Liner (Flue): 5" to 8" - Inner and Outer 0.016"

Outer Casing: 10" to 14" - Inner and Outer 0.015"

Insulation: The 1" space between the inner/outer walls is packed with mineral wool fiber insulation to provide superior insulating qualities in a slim-line design.

Airspace Clearance to Combustibles: 2"

### Height Requirements

The chimney must extend at least three feet above the highest point where it passes through the roof surface and at least two feet higher than any part of the building within a horizontal distance of ten feet.

# Stainless Steel Chimney Lengths

## Chimney Lengths

- Slim, advanced design allows for installation between 16" centers and still provides 2" clearance from combustible material.
- Secure twist-lock design couples chimney sections together with just a 1/8 turn. Locking bands secure joints.
- Includes locking band.
- 5" - 8" sections overlap by 1 1/8", 10" - 14" sections overlap by 1 1/4".
- Chimneys are sized according to the inner diameter and are available in 5" through 14".
- The outside diameter is 2" larger than the inside diameter.

## Chimney Offset Charts

It may be necessary to offset the chimney in order to clear a joist or an obstacle. The two (2) charts on the following page will assist you in selecting the proper combination of elbow angle and chimney length(s) that will provide the necessary degree of offset within an available height.

1. Select the column with the proper chimney diameter of your system.
2. Determine the distance of the offset required by dropping a plumb line for an accurate measurement. The offset is measured at the chimney centerline, as per the "A" Offset measurement in the diagram below.
3. On the chart, find the predetermined distance

(under the "A" column) required for the 15° elbow. For greater offset, use the 30° offset chart.

4. After finding the offset, look at the "B" (height) measurement in the chart to find the specified height. The appropriate "chimney lengths" required in between elbows is found in the left-hand side column of each chart.

### NOTE:

- Model TLC chimneys are limited to offsets not exceeding 30°. Combining elbows for greater angle is not permitted.
- One pair of (two) elbows may be used for interior installation only.
- Never install an elbow in a joist area. Chimney sections must pass vertically through framed joist areas.
- Locking Bands must be used at all chimney joints.
- Each elbow resupport will support 15 feet of chimney.
- The maximum length of chimney allowed between elbows is 6 feet.

# Stainless Steel Elbows and Tees

## Insulated 15° and 30° Elbow Kits

- The insulated elbow is used when offset is required.
- Locking bands must be used on all elbows.
- A maximum of 6 feet is allowable between offsets.
- Elbow is fully insulated and can be used with the same 2-inch clearance as chimney lengths.
- Elbow support must be used with all offset installations and will support 15 feet of chimney.
- Elbows do not have twist-locking ridges, so they can be rotated to attain optimum positioning offset and allow chimney to return to correct vertical alignment prior to installing locking bands.
- May not be used outdoors.
- All sizes are available in 15° & 30° kits only.
- Elbow kits include:
  - 2 elbows (Exception: 12" and 14" sizes include four 15° elbows assembled into two 30° elbows)
  - 2 locking bands (Exception: 10", 12" and 14" sizes include four locking bands)
  - 1 elbow support
  - All hardware

Insulated Tee with Tee Cap

- The insulated chimney tee may be used for through-the-wall installation, using a wall support.
- A chimney length is required to pass safely through a wall.
- Includes the following:
  - Two locking bands
  - 5" to 8" sizes have an **uninsulated** (single-wall) twist-lock tee cap.
  - 10" to 14" sizes have an insulated press fit tee cap.

# Supports

## Adjustable Wall Support

- Used to support the chimney on a through-the-wall installation.
- 5" to 8" sizes include top plate, side brackets, hardware, non-twist-lock insulated tee cap, and a long L-bracket to hold tee cap in place.
- 10" to 14" sizes do not include the cap. Use tee cap packaged with tee.
- 2" to 6" clearance away from wall.
- 5" to 8" sizes support between 30 feet and 74 feet of chimney, based on size and orientation. See instructions for specific heights.
- 10" to 14" sizes support up to 40 feet of chimney.
- **12" to 14" sizes are nonadjustable supports.**

**Non-Twist-Lock Insulated Tee Cap**  
(5" to 8" sizes)

## Adjustable Intermediate Wall Support

- Used as supplementary support when chimney system height exceeds maximum height allowed by wall support.
- Supports an additional 38 feet of chimney.
- Includes top plate, support band, side brackets, and hardware.
- 2" to 6" clearance away from wall.

## Ceiling Supports

- For use in flat ceiling support installations.
- Supports a total of 50 feet of chimney above.
- Chimney pipe **cannot** pass below support.
- Matte black finish with ceiling ring to cover rough opening.
- Also acts as a firestop.
- Must always use stovepipe adapter. See page 17.

## Cathedral Ceiling Support Box

- Used in pitched ceiling support installations.
- Supports a total of 38 feet of chimney with up to 15 feet below support. Includes support clamp, allowing chimney pipe to pass below support.
- Matte black finish with ceiling trim to cover rough opening.
- Also acts as a firestop with use of trim plate.
- 12/12 maximum pitch.

# Supports

## Adjustable Roof Support

- The roof support may be used on a roof and adjusts to any roof pitch.
- It may be used above an offset to support the offset or as a supplementary support when the chimney height exceeds that of the primary support.
- Supports a total of 30 feet of chimney with up to 20 feet below support.
- Does not act as a firestop.

- Contains one 18-inch length of pipe with roof brackets preinstalled. Includes hardware.
- Fits all roof pitches. Mounts easily on top of roof.
- Supports a total of 30 feet with up to 20 feet below the support.
- Does not act as a firestop.

## Attic Insulation Shield

- The attic insulation shield must be installed where the chimney enters the attic space.
- Designed to keep insulation away from the chimney and to maintain the mandatory 2-inch clearance to combustibles.
- Also acts as a firestop.
- Not to be used for enclosed chimneys passing through attic. Instead, use firestop radiation shield and rafter radiation shield.

## Roof Flashing Selection Chart

*In this example, the pitch is 3/12.*

To determine what roof flashing you'll require, you must determine the pitch of the roof. To determine the pitch, you'll need two rulers and a level. Measure the number of inches from the end of the level down to the roof.
