

Rapsel

Rapsel

Negli anni Settanta, quando l'arredo aveva una connotazione tradizionale, Rapsel emerse nel panorama italiano, come importatrice coraggiosa di design scandinavo.

Nel 1975 decise di intraprendere in proprio la strada del design per bagno, stimolata dalla richiesta di prodotti che si adattassero alla rubinetteria danese Vola, disegnata da Arne Jacobsen. Nacque così il Washmobil, il primo lavabo free standing nella storia del bagno, frutto della collaborazione fra i due giovani architetti Guido Berger e Annette Stahl e Rapsel. La serie Washmobil suscitò grande interesse, richiamando, tra l'altro, l'attenzione di Philippe Starck, che iniziava in quegli anni la sua attività.

Nel 1982 fu proprio Starck a creare su misura per l'Eliseo e, successivamente, per un grande progetto alberghiero, il suo primo mobile di design per bagno: Lola Herzburg. Questo oggetto, unico nel suo genere, suggeriva nuove leggi estetiche per il bagno: oltre a essere free standing, prevedeva una serie di accessori tutti integrati nella struttura portante.

Seguirono l'Euclide di Finn Skodt (1982), il primo lavabo tutto in acciaio inox; il Rapsody (1985) di Berger & Stahl, il primo lavabo con piano in vetro e vasca in acciaio inox; il rivoluzionario Nost (1990), profondo pochi centimetri e tutto in vetro; il Coup de foudre (1991) di Shiro Kuramata, lavabo e consolle sono realizzati in un'unica lastra di vetro; il Trieste (1995) di Peter Lorenz, primo lavabo sagomato in un'unica lastra di vetro; il lavabo Montecatini (1998) da un disegno di Gio Ponti del 1933; il Sirene (1997) di Andrée Putman, versione elegante e contemporanea degli antichi lavabi da appoggio.

È verso la fine degli anni '90 che Rapsel ritorna a produrre lavabi in ceramica, caratterizzati da forme e dimensioni estremamente moderne, come quelle dell'Albeus, del Kanal e Grand Kanal, frutto di nuove e sofisticate tecnologie. Negli anni successivi viene riproposto l'acciaio inox e i progetti sono caratterizzati da un design per bagno futuristico, i lavabi X-Treme e la vasca Carezza Lake (prima vasca in acciaio nella storia del bagno) entrambi dell'austriaco Peter Büchele, ne sono chiari esempi.

Da sempre alla ricerca di nuovi progetti funzionali ed estetici, con il nuovo millennio Rapsel inaugura la sperimentazione di materiali sempre più ricercati ed esclusivi. Ispirati al benessere e ad un nuovo modo di progettare l'ambiente bagno, che si affida sempre più spesso ad aspetti emozionali e sempre meno a un'idea di lusso come espressione di uno status symbol.

From the very beginning, in the 70s, Rapsel carried forward its creative belief with consistency and determination.

The company's policy is to operate in the area of contemporary design, identifying objects with highly innovative content and great quality of aesthetics and form.

Research is the basis of all projects. The bathroom design collections is addressed to a sophisticated public consisting of opinion leaders and consumers who lead to a stylish life and have good taste.

Rapsel's trend setting objects have great character and in some cases they have even been described as 'cult objects' of bathroom design. These have become essential reference points in the evolution of the way of living and its models. Just to give a very obvious example, the design approaches like those of Starck and Shiro Kuramata, although very different and distant from each other, co-exist harmoniously in Rapsel's catalogue. In fact, through the selection of the single projects, the real identity of the company emerges and becomes stronger.

However these are not only objects of bathroom design and mere appearance, but they are functional and from the technical point of view perfectly made. They are a tangible sign of what the future of domestic design is going to be.

Also in the contract division, which has developed in last years, Rapsel confirms its desire to investigate into new shapes, technologies and materials in order to create atmospheres, to suggest sensations and welcome human beings in a space, the bathroom, which is becoming more important inside public areas. In fact Matteo Nunziati collections, Nami and Yume, are the expression of the careful project research which Rapsel has been following since the beginning.

AREA TECNICA TECHNICAL AREA

ELLE

design Matteo Nunziati, 2010

Sistema di mobili per il bagno composta di lavabo a forma di elle, lavabo semplice da appoggio, mobili contenitori con e senza cassetti e da uno specchio con luce.
Program of bathroom furniture consisting of washbasins, containers, drawers and mirrors.

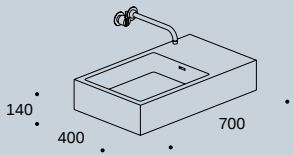

ELLE LAVABO

design Matteo Nunziati, 2010

cod. ELW1 070

Lavabo da appoggio in Hanex® bianco con vaschetta integrata (dimensioni 420 x 340 x 90 mm), con troppo pieno e piletta scarico up&down.
Washbasin crafted from Hanex® with overflow system (dimensions 420 x 340 x 90 mm) with up&down drain.

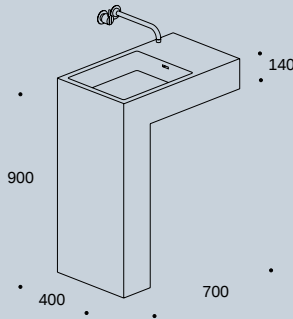

ELLE LAVABO CON COLONNA

design Matteo Nunziati, 2010

cod. ELW2 070

Lavabo da terra in Hanex® bianco con vaschetta integrata (dimensioni 420 x 340 x 90 mm), con troppo pieno e piletta scarico up&down.
Lavabo reversibile che può essere montato in appoggio al lato sinistro o destro dei mobili del sistema Elle.
Washbasin with pedestal in an “l” shape that can be mounted left or right on elle furniture system.
Crafted from Hanex® with overflow system (dimensions 420 x 340 x 90 mm) with up&down drain.

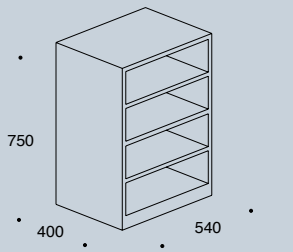

ELLE BOX 54

design Matteo Nunziati, 2010

cod. ELF1 054

Mobile contenitore in Wengè con 4 ripiani senza cassetti (dimensioni 540 x 750 x 400 mm).
Wengè furniture with four shelves (without drawers) - (dimensions 540 x 750 x 400 mm).

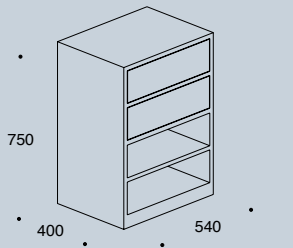

Disponibili anche altre finiture, con un aumento del 15% circa.
Available also other finishing, with an increase of about 15%.

ELLE BOX 54

design Matteo Nunziati, 2010

cod. ELF2 054

Mobile contenitore in Wengè con 2 cassetti superiori e 2 ripiani nella parte inferiore (dimensioni 540 x 750 x 400 mm).
Wengè furniture with two drawers above and two shelves below (dimensions 540 x 750 x 400 mm).

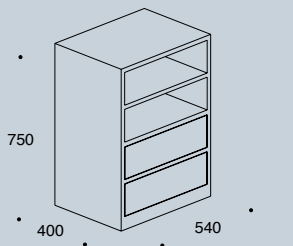

Disponibili anche altre finiture, con un aumento del 15% circa.
Available also other finishing, with an increase of about 15%.

ELLE BOX 54

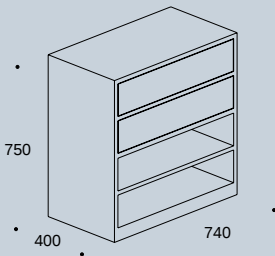

design Matteo Nunziati, 2010

cod. ELF3 054

Mobile contenitore in Wengè con 2 cassetti inferiori e 2 ripiani nella parte superiore (dimensioni 540 x 750 x 400 mm).
Wengè furniture with two drawers below and two shelves above (dimensions 540 x 750 x 400 mm).

Disponibili anche altre finiture, con un aumento del 15% circa.
Available also other finishing, with an increase of about 15%.

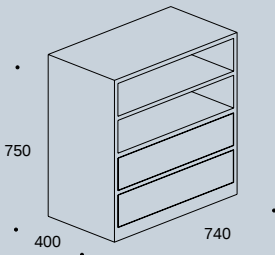

ELLE BOX 74
design Matteo Nunziati, 2010

Mobile contenitore in Wengè con 2 cassetti superiori e 2 ripiani nella parte inferiore (dimensioni 740 x 750 x 400 mm).
Wengè furniture with two drawers above and two shekves below (dimensions 740 x 750 x 400 mm).

Disponibili anche altre finiture, con un aumento del 15% circa.
Available also other finishing, with an increase of about 15%.

cod. **ELF2 074**

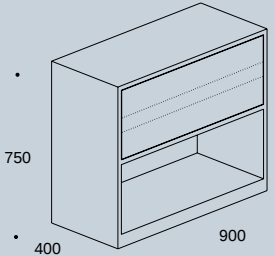

ELLE BOX 74
design Matteo Nunziati, 2010

Mobile contenitore in Wengè con 2 cassetti inferiori e 2 ripiani nella parte superiore (dimensioni 740 x 750 x 400 mm).
Wengè furniture with two shekves above and two drawers below (dimensions 740 x 750 x 400 mm).

Disponibili anche altre finiture, con un aumento del 15% circa.
Available also other finishing, with an increase of about 15%.

cod. **ELF3 074**

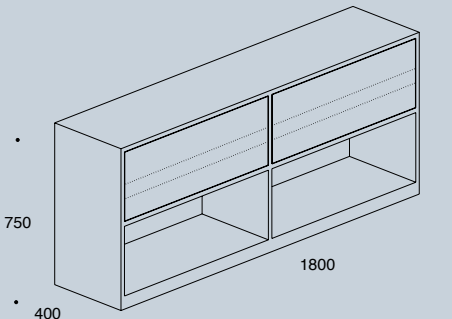

ELLE BOX 90
design Matteo Nunziati, 2010

Mobile contenitore in Wengè con 1 cassetto superiore con maxi frontale e 1 cassetto a scomparsa (dimensioni 900 x 750 x 400 mm).
Wengè furniture with a maxi drawer and a rollaway one inside (dimensions 900 x 750 x 400 mm).

Disponibili anche altre finiture, con un aumento del 15% circa.
Available also other finishing, with an increase of about 15%.

cod. **ELF2 090**

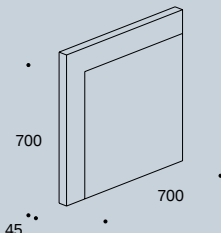

ELLE BOX 180
design Matteo Nunziati, 2010

Mobile contenitore in Wengè con 2 cassetti superiori con maxi frontale e 2 cassetti a scomparsa (dimensioni 1800 x 750 x 400 mm).
Wengè furniture with two maxi drawers and two rollaway drawers inside (dimensions 1800 x 750 x 400 mm).

Disponibili anche altre finiture, con un aumento del 15% circa.
Available also other finishing, with an increase of about 15%.

cod. **ELF2 180**

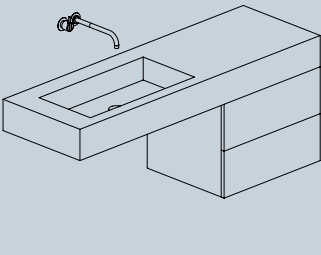

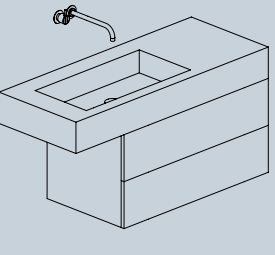

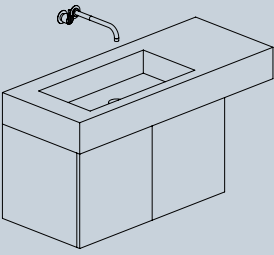

ELLE MIRROR 70
design Matteo Nunziati, 2010

Specchio retroilluminato da sistema led con acidatura dalla caratteristica forma ad elle (dimensioni 700 x 700 x 45 mm).
Backlit mirror with an l shape ornament and led lighting (dimensions 700 x 700 x 45 mm).

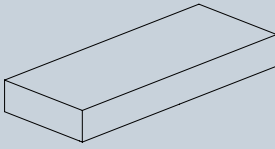

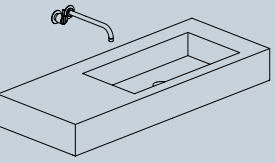

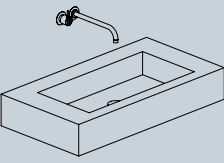

cod. **ELLD 070**

INFINITY
design Nespoli & Novara, 2007

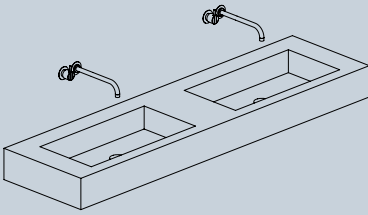

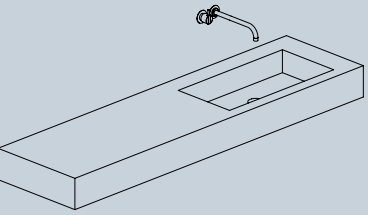

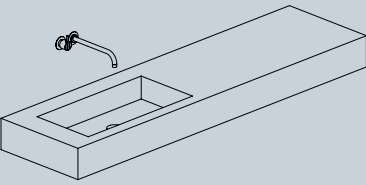

Sistema di mobili per il bagno composta di piani e contenitori in Parapan® e lavabi in Nikron®.
Program of bathroom furniture consisting of containers and countertops in Parapan® and Nikron® washbasin.

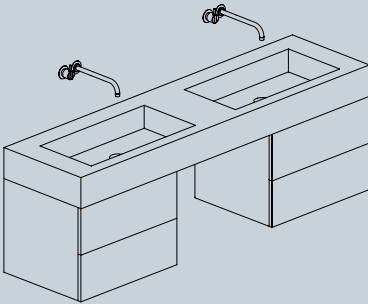

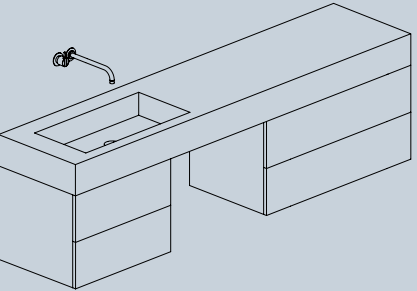

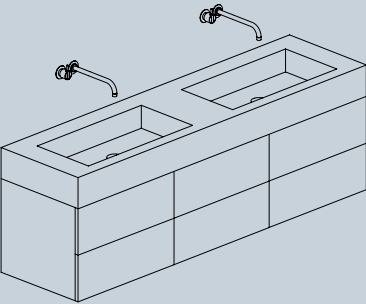

*** Utilizzare n. 1 staffa supporto.**
N. 1 wall support is needed.

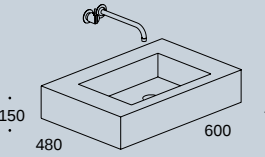

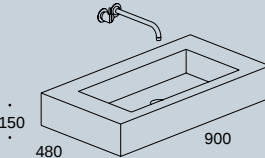

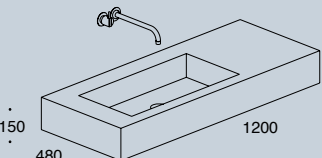

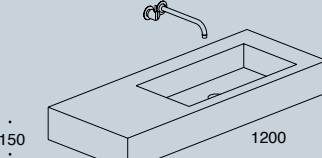

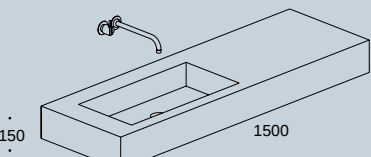

*** Utilizzare n. 2 staffe supporto.**
N. 2 wall supports are needed.

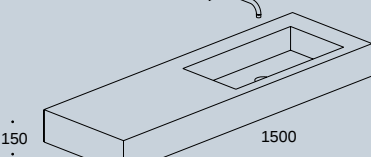

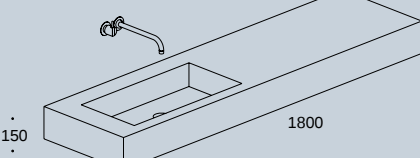

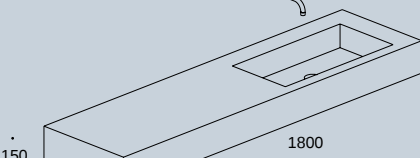

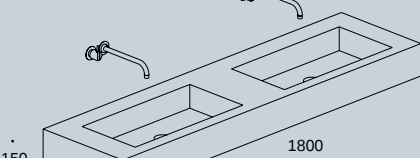

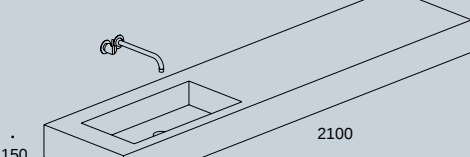

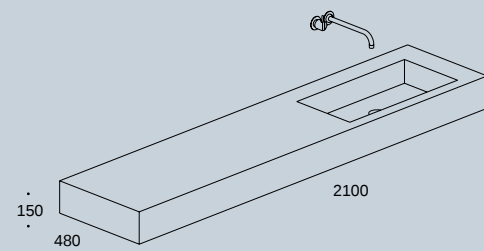

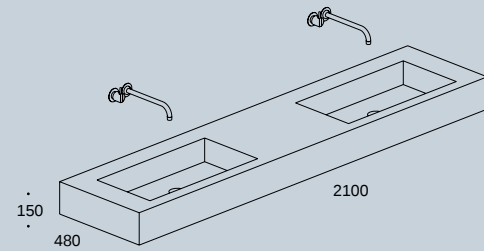

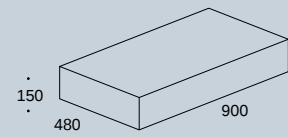

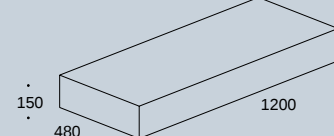

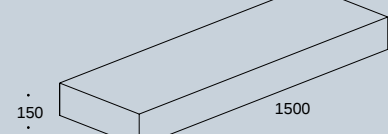

*** Per piani superiori ai 150 cm senza box, utilizzare n. 3 staffe supporto.**
For tops longer than 150 cm, n. 3 wall supports are needed.

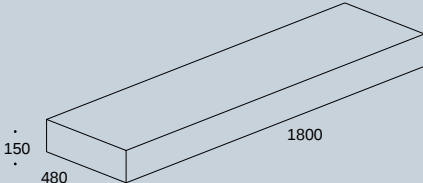

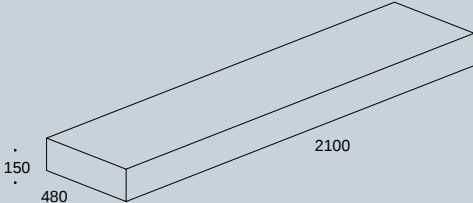

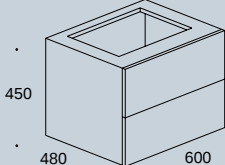

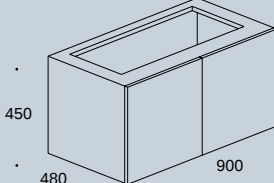

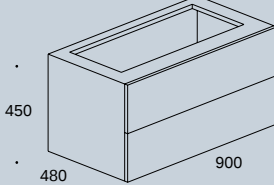

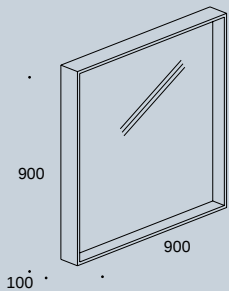

*** Non utilizzare staffe supporto il piano lavabo è sorretto dai box.**
No wall supports are needed.

design Thorup & Bonderup, 1972

Sgabello in acciaio cromato.
Stool in chrome.

cod. STLC 016

MATERIALI

PARAPAN®

È un materiale acrilico massiccio riciclabile al 100%, colorato uniformemente in tutto lo spessore e viene prodotto senza l'impiego di solventi tossici, ciò lo rende quindi tranquillamente utilizzabile in ambiente domestico. Raggiunge una lucentezza assoluta, ed ineguagliabile mantenendo il suo colore inalterato anche dopo prolungate esposizioni alla luce. Possiede un'ottima resistenza ai graffi, in ogni caso piccoli graffi sono ripristinabili.

VELVET®

Superficie solida realizzata con cariche minerali e nitrato d'alluminio a bassa percentuale di resine poliestere. Superficie molto vellutata al tatto.

CRISTALPLANT®

È un materiale composto per la maggior parte di cariche minerali legate a piccole percentuali di resine.

NIKRON®

Superficie solida realizzata con cariche minerali a bassa percentuale di resine acrilica.

CORIAN®

Superficie solida realizzata con cariche minerali a bassa percentuale di resine acrilica.

ALICRITE®

È un materiale acrilico massiccio riciclabile al 100%, viene prodotto senza l'impiego di solventi tossici, ciò lo rende quindi tranquillamente utilizzabile in ambiente domestico.

MATERIALI, USO E MANUTENZIONE

LEGNO

Prodotti idonei
