## Talia...elegantly Continental

**Talia**\*...a truly unique blending of contemporary motifs and Renaissance fluidity. GROHE's Talia kitchen faucets are distinguished by the beautifully arched details of their spouts and their handles. Talia is characterized with a single word...graceful.

# Technological Innovation... the GROHE commitment to quality.

From a technical point of view, faucets and shower products are considerably more complex than you might imagine. If a faucet does exactly what you expect it to do -- provide water with perfect reliability, regardless of the conditions it's required to operate in -- what does it matter how much effort went into its design?

At GROHE, we know it matters a lot.

Everything we do is geared to creating faucets that will function perfectly, not only today, but for many years to come.

Every GROHE component is engineered and manufactured to show minimum signs of wear under the most extreme, abusive conditions imaginable. From washers and snap couplings to springs, screws and aerators, every component is essential to the extraordinary durability and operation of GROHE faucets.

# Take a close look... GROHE's attention to detail makes the difference

- State-of-the-art ceramic disc cartridges for smooth and precise water control.
- Extreme low noise operation, built to meet strict European noise standards.
- Solid cast brass construction.
- GROHE has established the worldwide standard for shower safety valves. Reliable, high performance thermostatic temperature control valves or pressure balance valves offer two options for protection against accidental scalding in the shower.
- Integrated atmospheric vacuum breaker simplifies and streamlines installation of kitchen pull-outs to meet local code requirements. (Ladylux plus, Ladylux, Europlus, and Eurowing)
- Durable, long lasting decorative finishes.
   Tightly controlled water flow pattern minimizes splashing.
- German engineered to incredibly close tolerances for consistent, long lasting, and reliable performance.
- Optional escutcheons and soap/lotion dispensers in matching finishes allow several installation alternatives.

## **General Information**

GROHE products listed here are organized according to product use. The Table of Contents and Product Number Index will help you to locate products easily either by application or by specific product number.

For further information on specifications, commercial applications, or specific installation requirements contact your local GROHE representative or GROHE Technical Customer Service at 1-800-44-GROHE.

### **Codes and Standards Compliance**

GROHE products are manufactured to meet or exceed all applicable codes and standards including:

- ASME/ANSI A112.18.M
- · ANSI/NSF Standard 61, Section 9
- All major model and state plumbing codes

#### ISO 9001 Certification

GROHE was the first international faucet manufacturer to be awarded DIN ISO 9001 Certification. The ISO (International Standards Organization) standard 9001 covers the quality assurance activities in not only manufacturing and assembly, but also in the areas of management, marketing, engineering, order handling and customer service. In order to qualify for ISO 9001 certification, GROHE's Quality Assurance System had to conform to all of the strict requirements of the standard and must have been audited and inspected by an independent internationally accredited auditing organization (TUV Cert). To maintain its certification, GROHE must meet a yearly control audit, and must reapply for a complete certification audit/inspection every three years.

#### **Water Conservation**

To help conserve our precious natural resources, all GROHE kitchen, lavatory, and bar faucets (excluding non-applicable commercial products) are restricted to 2.2 gpm at 60 psi (2.5 gpm at 80 psi or 9.5 lpm) to conserve water.

All shower heads and hand showers unless otherwise indicated are restricted to 2.5 gpm at 80 psi (9.5 lpm).

#### Warranty

All GROHE products carry a limited warranty. See the GROHE Price List for complete details.

#### **Important Notice**

GROHE products are distributed in over 185 countries. The product information contained in this catalog applies to those GROHE products sold in North America only.
