

COMMERCIAL OIL AND DUAL-FUEL WATER HEATERS

A. O. Smith's COF water heaters are fired on No. 1 or 2 fuel oil while the COBT models have the versatility of operating with natural or propane gas and/or No. 1 or 2 oil. The COF/COBT models include some of the largest and most powerful A. O. Smith tank-type water heating systems available – with storage capacities up to 600 gallons and input up to 2.5 million BTUs per hour.

FULLY AUTOMATIC CONTROLS WITH SAFETY SHUTOFF — High temperature limit control (manual reset). CSA Certified and ASME rated temperature and pressure relief valve. Hinged door control compartment with key lock for ease of access. Two thermostats, upper and lower, for accurate temperature control.

JACKET & INSULATION — Heavy gauge steel jacket with baked powder coat finish. Insulated with high-density foam insulation that meets or exceeds all required standards.

Meets or exceeds the thermal efficiency and/or standby loss requirements of the U.S. Department of Energy and current edition ASHRAE/IESNA 90.1.

FEATURES

UL — Entire unit UL listed.

GLASS-LINED TANK — Exclusive corrosion protection with glass-lining on all interior surfaces. Multiple anodes provide cathodic protection.

ASME CONSTRUCTION STANDARD — 160 PSI design pressure on all models.

OTHER FEATURES

- Two layers of high temperature ceramic fiber insulation in combustion chamber
- Flame inspection port opening
- Mounted on rugged channel iron skids
- ASME Stamping
- Combination temperature and pressure gauge
- Low water cutoff
- Barometric draft regulator
- 120 volt control circuit
- Drain valve
- Removable lifting lugs
- Two 3 inch handhole inspection openings.

COF — OIL FIRED MODELS: No. 1 or 2 Oil 3450 RPM Motor • Multi-annular fuel containment combustor head • Available for firing light fuel oils including diesel • Oil ignition transformer • Integral 2-stage fuel unit • Squirrel cage blower • Oil safety valve.

COBT — COMBINATION GAS/OIL: Natural Gas or Propane & No. 1 or 2 Oil • 3450 RPM Motor • Multi-annular fuel containment combustor head • Gas electric pilot and gas ignition transformer • Pilot and main pressure regulators • Air safety switch • Manual fuel selector switch • Integral 2-stage fuel unit • Squirrel cage blower.

OPTIONS

Factory Mutual approved control arrangement • Industrial Risk Insurance (Formerly FIA) • High or low water pressure switch • 180°F water service thermostats • Modular graphic burner systems management on heaters with 270,000 BTU input and over • CSA certified and ASME rated T&P relief valve.

3-YEAR LIMITED TANK WARRANTY

- **FACTORY START-UP SERVICE INCLUDED**—Required for activating warranty and assuring maximum operating performance. Contact your local sales representative of authorized start-up agent to arrange a **FREE** certified start-up.
- For complete information, consult written warranty or contact A. O. Smith

Recovery ratings are based on 80% thermal efficiency.

**COBT models are 350,000 BTU.

For high altitude areas above 2,000', please advise altitude when ordering.

Certified Minimum Installation Clearances to Combustibles: Front: 18 inches

Back: 0 inches

Sides: 0 inches

Top: 5 inches

A clearance of 24 inches is recommended from serviceable parts such as relief valve, power burner, drain valve and anodes (anodes are located on side above cold water inlet).

COF/COBT models are Category I appliances (Fan Assisted) and require a negative draft. These units should only be commonly vented with other Category I negative draft appliances per the latest edition of the National Fuel Gas Code. An approved/listed Type "B" venting material is recommended.

A negative draft of -0.02" to -0.07" is required in the vent.

*Specify COF (Oil Fired) or COBT (Combination Oil/Natural Gas) Model.

**COBT models are 350,000 BTU

Example: COF-150-140 or COBT-150-350.

SUGGESTED SPECIFICATIONS

Water heater(s) shall be Model _____ as manufactured by the A. O. SMITH or an approved equal. Heater(s) shall have a minimum oil firing rate of _____ gallons per hour, an input rating of _____ BTU/HR. The heater(s) shall have a recovery rate of _____ GPH at a 100°F rise and a storage capacity of _____ gallons. The 160 psi design pressure tank shall be glass-lined with an alkaline borosilicate composition and fused to the steel by firing at 1600°F. The heater(s) shall be equipped with _____ NPT water inlet and outlet openings, (2) 3" handhole cleanouts, and carry a National Board stamping. The heater(s) shall be ASME and the entire unit listed by Underwriters Laboratories. Controls shall include: high temperature limit control (manual reset), upper and lower thermostats, combination temperature and pressure gauge, low water cutoff, CSA certified and ASME rated T&P relief valve, and barometric draft regulator. Control compartment door shall be hinged for easy access and include cam locks for security. The heater(s) shall be equipped with multiple anodes for cathodic protection. The heater(s) shall be insulated with glass fiber insulation and meet or exceed the thermal efficiency and/or standby loss requirements of the U.S. Department of Energy and current edition of ASHRAE/IESNA 90.1 and insulation R value. The heater(s) shall include a drain valve and flame observation port. The jacket shall be baked powder coat finish. Heater(s) vessel shall have a 3-year limited warranty against failure as outlined in the written warranty.

The COF models shall have a UL listed burner with two-stage pump, oil safety valve, electronic flame safeguard, intermittent ignition and diaphragm air switch for proof of flame operation.

The COBT models shall include a dual fuel burner with two-stage oil pump, oil safety valve, electronic flame safeguard, intermittent ignition, diaphragm air switch, main and pilot automatic gas valves, gas pressure regulator and manual crossover switch.
